

30 patients  
Extensor mechanism  
reconstruction

Diagnosis

27 patients  
Periprosthetic Joint  
Infection

Diagnosis

3 patients  
Traumatic extensor  
mechanism injury with  
previous knee arthroplasty

21 patients  
Flap Performed at 1<sup>st</sup> stage

3 patients  
Flap Performed at DAIR

2 patients  
Flap Performed at Single  
stage

1 patient  
Flap Performed at 2<sup>nd</sup>  
stage

Outcome

Infection clearance 10  
Infection recurrence 11

Infection clearance 1  
Infection recurrence 2

Infection clearance 1  
Infection recurrence 1

Infection clearance 1  
Infection recurrence 0
